RE: IPP Addendum to NOI filed December 16, 2002

Dear Rick:

Please find enclosed, as UDAQ has requested, an addendum to the NOI submitted by IPA/IPSC on December 16, 2002 to construct a third power generation unit at the IPP facility near Delta in Millard County, Utah. This addendum sets forth in a single document the responses to requests for clarification already given by IPA/IPSC to UDAQ during the various meetings regarding the NOI. As we have previously stated, the proposed third unit at the IPP site would be one of the most controlled coal-fired boilers ever constructed, controlled to levels at or below those recently required by permit or consent decree at other coal-fired units, for all PSD pollutants. We are pleased to be working on this important project with you to protect air quality in Utah and to provide the citizens of Utah with electricity into the future. Should you or your staff require further clarification or further documentation, please call Lance Lee and we commit to responding quickly. As we've stated many times, our commitment is to protect Utah's environment, and to protect air quality in our pristine national parks and wilderness areas.

As IPA/IPSC has never received any notice of deficiency on its NOI, we presume that the December 16, 2002 NOI submittal was considered a complete application under UAC R307-401-1 and R307-415-5a(2)(b). This Addendum is intended solely to provide you, the federal land managers in their consultative role, the EPA, and the interested public with one single document for review, not to act as a new application. Therefore we respectfully request that you confirm that the December 16, 2002 application was complete. Of course, as stated above, we will continue to provide you and your staff responses to any questions or concerns as you complete your review. IPA/IPSC will commit to assist UDAQ in any way possible to provide all the information you need to reach a draft approval order for the project as expeditiously as possible. IPA/IPSC anticipates that an intent to approve can be issued this June, and we ask that you and your staff simply allow us to review that intent to approve prior to issuance. We look forward to working with UDAQ to reach this resolution and move this important project forward. Please call me directly with any questions or concerns, or have your staff call Lance Lee.

Sincerely,

Reed T. Searle  
General Manager
